## International Harvester Oil and Gas Engines

**SUCCESSFUL** farmers are no longer asking, "Shall I buy an engine?" They have passed that point and now inquire, "Which engine shall I buy?" A little careful observation will show that International Harvester engines are the most satisfactory. No doubt is left when features like the following are studied: Detachable valve guides, offset cylinder head, fuel pump, split-hub fly-wheel, extra large intake and exhaust valves, etc. Ask the men who have used I. H. C. engines. That is the best test. They will explain the excellence of I. H. C. construction, simplicity, strength and durability. Study the engines yourself at the nearest dealer's where International Harvester engines are sold. They are made in all styles, and range in size from 1 to 50-hp. They operate on low and high grade fuels. Write for our interesting and instructive catalogues, and when we send them we will tell you where the engines may be seen. A postal will do.
